

Karthikeyan A K (Ruby on Rails Engineering Manager)

• (+91) 8428 05 0777 • mindaslab@protonmail.com

Commercials

Current CTC: 33 Lakhs / annum

Expected CTC: 45 Lakhs / annum

IN BRIEF

Problem solver, give me the specs I'll show you the product.

Team builder, build high permanence teams.

Kanbanero, manage teams.

Data junkie, collect app metrics, improve efficiency.

Clean Coder, create readable and maintainable code with Ruby on Rails.

ABOUT ME

20 years of developing and product management experience, mainly catering startup clients, building high performance teams for them, solving the team's coding challenges by using algorithmic techniques, design patterns and paradigms like functional programming.

Worked in corporates to implement agile culture, to speed up their process and keep up with competition. Porting their apps to new age, and scaling it up for massive user growth.

I have closely worked with HR and financial teams to plan for recruitment, funding and billing of software development. Have worked in positions where I had to manage teams from different companies across continents.

My communication skills combined with tech ability have propelled me to become product owner in many cases, where I need to interact with the client and translate it to technical requirements, manage deliveries and so on.

I am avid contributor and evangelist for free software, I contribute by creating free software content, finding and reporting issues, gathering data for free software for A.I age etc.

EDUCATION

Bachelor of Engineering (Electronics & Communication)

University of Madras, 2004

SKILLS

People Manager
Tech Architect
Product Owner
Automated Testing

Ruby on Rails
SQL
JavaScript
Python

GNU/Linux
Clojure

EXPERIENCE

HealthiCity (Feb 2022 – Present)

Code and manage a high performance team. Introducing A.I tech in code.

Lumera (Mar 2021 – Aug 2021)

Massive data processing with Kafka and Ruby.

Guidehouse (Feb 2020 – Jan 2021)

Architecting high throughput health insurance products.

Francium (2019 – 2020)

Worked on financial products.

Trumatics (2017 – 2019)

Trying to create a Data Science company.

Zanec (2014 – 2017)

Managing Ruby on Rails projects.

Mind As Lab (2006 – 2014)

My own PHP development house. Now it's a HR firm run by my friend.

HCL Technologies (2004 – 2006)

Embedded systems engineer.
